ABOUT US

Vision LLC was incorporated to provide cutting edge innovative solutions for today's sophisticated consumers. Industry leading companies like Samsung, Hikvision, Triax, Skytrix, HID, Grundig, BFT, Came to name a few all recommend **Vision LLC** to professionally sell, service and support their systems.

We offer everything from complete turn-key integrated systems, service and annual maintenance. Our areas of expertise include, but are not limited to - High Definition CCTV Systems, Satellite Systems (SMATV), Access Control both Biometric and RFID based, Audio Video Intercom, Security Systems and Network & Fiber Optic solutions. We support almost all Leading Facilities Management Companies, Contractors, the Royal Families, Military, Police, Municipality & Government.

We service the entire UAE Market from our offices in Abu Dhabi and Dubai. Our factory-trained technicians, state-of-the-art service center and certified-installation crew ensure that our solutions perform to the highest level of customer expectations – making us the systems integrator of choice today.

MISSION

Vision LLC is focused on delivering excellence. Being dynamic has made us expand even faster, conquer new market share and increase our product portfolio.

IP Cameras & Video Surveillance Systems

Ensure peace of mind with Vision Integration's expertise in IP Cameras and video surveillance systems. Your system will be designed to your specific security needs and can range from stand-alone cameras to fully integrated security control centers. We understand the benefits of video surveillance such as risk management, asset protection and employee safety are important, which is why we are committed to understanding your project needs and providing the right solution for our clients.

Compiling all the critical video from daily operations, the central office management center is the core of a total CCTV system. It provides the utmost reliability and manageability for data protection and alarm response. It also provides a means for improvements in business operations.

- **Video Management Platform:** HikCentral is the core of the CCTV system to manage, view live, play back, and control all the daily operations on all connected devices.
- **Monitor Display System:** Everything from standalone monitors to expansive TV walls.

IPTV SYSTEM

GSS.box

Satellite TV everywhere at home

For now the biggest channel variety with TV and radio stations can be received via satellite. Unfortunately there isn't a satellite connection at every place in the home. In many cases the user wants to watch his favourite channel additionally via mobile devices like tablet PCs, notebooks, netbooks or smartphones.

The GSS.box is able to connect the satellite signal with the various devices. If it is connected with the satellite the GSS.box will convert the satellite channels to an IPTV format. Now the signals can be fed in the inhouse network and be transmitted via LAN or WLAN.

- HD TV
- PVR
- TIME SHIFT
- EPG
- DLNA
- ECO ENERGY Saver
- DVB RECEIVER

SAT SIGNAL

IPTV SIGNAL

SAT > IP

The GSS.box is based on the new SAT-IP standard developed by ASTRA. Free-to-air satellite channels can be wireless transmitted to smartphones, tablet PCs and notebooks via a home network.

The GSS.box is equipped with 4 satellite tuners. Four users are able to watch their favourite channel with it. The main condition is that the mobile devices and the GSS.box have to be connected in the same network via LAN or WLAN.

Low-priced apps make recording movies and timeshift watching possible. Also an EPG is available with them. Even user for teletext get one's money's worth.

The TV channels are receivable even at the home PC. The wired PC as suitable as the wireless connected notebooks and netbooks.

Features

- 4 satellite inputs for the reception of SDTV and HDTV and radio stations
- DiSEqC 1X and Unicable control
- Box configuration via web interface
- IPTV distribution via router up to 4 users via LAN or WLAN
- Television with Tablet PC, Smartphone, Games console, PC, Notebook, Netbook, IPTV receiver, Smart TVs with suitable software resp. App
- PVR and Timeshift function and EPG via software resp. App functionality
- 6 status LEDs at the front panel
- Max. 30 W in operation, < 4 W in stand by
- Dimensions (W x H x D) in mm: 190 x 45 x 175

Access Control Systems

Access Control Systems are meant to authorize users under controlled conditions; so whether your project is as simple as a front door locking system or as complex as a multi-unit system with thousands of users, Vision Integration understands your need to mitigate the risk of unauthorized access, potential property loss and employees safety. Our Security Specialists have the experience to design and install an access control system to meet your specific needs.

CAR PARKING ACCESS SYSTEMS

WISENET

Optimal Solution for Parking Monitoring

5M Pixel cameras record vehicle condition every nook and corner at entering and exit.

Secure from profit loss, deliver customer impression, build trust, and create top VIP parking service.

Turnstiles

TRIPOD TURNSTILES

TWISTER is the stainless steel tripod turnstile that enables a company or public office to optimise entry and exit operations, allowing precise, secure management of all access points. It is practical to install, because it is already preassembled, sturdy and safe, even in an emergency, thanks to the automatic unlocking as standard and the anti-panic arm supplied.

OPERATORS FOR AWNINGS, SHUTTERS AND BLIND

ART (Advanced Revolution Technology) is a full range of advanced, high-performing solutions for awnings, shutters and blinds. It ensures safety and ease of use for users and flexibility and ease of installation for professionals.

FOLDING DOORS OPERATOR

F4000 is the perfect operator for folding doors with slide rail generally found in industrial environments. Its versatility, however, means it is also suitable for doors with two swing leaves in residential applications

SECTIONAL INDUSTRIAL DOORS OPERATOR

There is nothing more secure than **CBX** for automating a sectional industrial door thanks to the encoder technology, in both the 230 and 24 V versions. It ensures movement that is reliable over time and is also ideal for sliding and folding doors. A greater thrust is also guaranteed by the three-phase version.

The logo for XVIA, featuring the letters 'XVIA' in a stylized font. The 'X' is green, 'V' is red, 'I' is blue, and 'A' is grey.

BUSINESS SOLUTIONS

Speaking of workplaces, we often focus on the issues of safety and comfort. The development of solutions that meet both criteria has always been the foundation of our philosophy. Came, with extensive know-how in the automation market, aims to achieve the highest standards required by customers in terms of efficiency and reliability.

AUTOMATIC DOORS

SIPARIO, the automatic door that combines technology and easy installation, optimising space with just 10 cm. It can be combined with different safety and command devices, also in creating particularly elegant access points.

ROAD BARRIERS

GARD 4 automatic barriers are the ideal solution for business environments where safety comes first. By connecting the barrier to the access control system, it is possible to restrict access to authorised personnel only, for greater safety. A modern design and great reliability are the strengths of the whole range of Came barriers.

PS ONE

Automatic parking facilities with barcode ticket

Modular, comprehensive management of occasional users and subscribers.

[Details](#)

PS Token

Automatic parking systems with transponder tokens

The token solution for managing occasional users with payment.

[Details](#)

SPORTS FACILITY SOLUTIONS

Solutions for access control, great versatility of use and particular attention to design, to ensure seamless integration where high performance, safety and discretion are required. They can be used in fitness centres, swimming pools, wellness centres and, more broadly, in stadiums and large sports facilities.

MOTORIZED SWING TURNSTILE

WING40 combines design and technology. A motorised turnstile designed to embellish the entrances at gyms, swimming pools and wellness centres. The control board, power supply and electric brake are concentrated in only 168 mm. Designed to allow disabled users to pass through, it is quick to install and can be combined with a second turnstile.

FULL HEIGHT TURNSTILE

GUARDIAN is the full height turnstile for large openings, perfect for environments where safety is an essential requirement. Ideal for use in stadiums, it is designed for outdoor applications, thanks to the body made of galvanised steel and the special epoxy paint.

TOURIST FACILITY SOLUTIONS

Technology becomes an added value for tourist facilities when it manages to create a safe, comfortable and relaxing environment that is modern and cutting-edge at the same time. The experience gained over the years makes us the ideal partner to ensure the safety of our solutions in relation to the standards required by hotels, campsites and marinas.

AUTOMATIC DOORS

SIPARIO is the automatic door that combines technology and easy installation. Ideal for complex environments, with low main beams or false ceilings. It enables particularly elegant access points to be designed, incorporating technology and safety, even in an emergency, thanks to the anti-panic system supplied.

ROAD BARRIERS

Every automatic barrier in the **GARD** series, suitably connected to Came's various access control systems, can be used to identify, memorise and enable entry and exit to authorised personnel only, for safe management of all tourist facilities such as ports, hotels and campsites. A modern design, also using stainless steel, and great reliability are the strengths of the whole range of Came barriers.

ROAD BARRIERS

Every automatic barrier in the **GARD** series, suitably connected to Came's various access control systems, can be used to identify, memorise and enable entry and exit to authorised personnel only, for safe management of all areas around large sports facilities. A modern design and great reliability are the strengths of the whole range of Came barriers.

AUTOMATIC DOORS

SIPARIO is the automatic door that combines technology and easy installation, optimising space with just 10 cm. It is the ideal solution for complex environments, with low main beams or false ceilings. It enables particularly elegant access points to be designed, incorporating simple management via wireless, thanks to the transceiver transmitter.

CAR PARK PROTECTOR

UNIPARK is the safe, reliable car park protector, with radio commands and operation in the event of a power failure. It is ideal for selecting parking reserved for guests at hotels or any tourist accommodation.

TRIPOD TURNSTILES

Nothing is more convenient than the **TWISTER** tripod turnstile when you need to select access and manage flows at theme parks and water parks. An added bonus for those running a campsite wanting to ensure privacy and safety for their customers when returning from the beach.

XVia
